

Get Connected: Building Your Digital Workplace

An IHS Markit Technology Webinar

Mobile and IoT devices are exploding

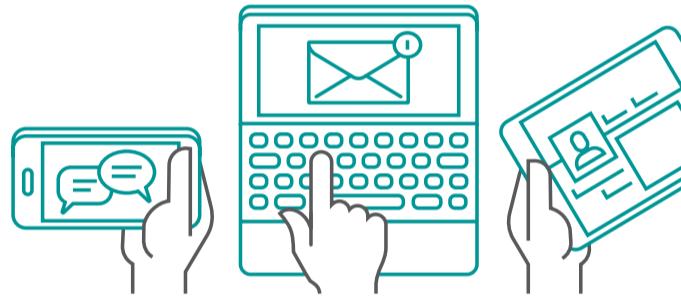

IoT grows from niche application to **15%** of network-connected devices.

2 out of 3 new network devices will be mobile.

User-owned devices will soon be the majority of network-connected devices.

IT will no longer own the devices that connect

Cord-cutting is gaining ground

Almost **1/3** of organizations move to wireless-only employee access by 2018.

Security, performance, cost and reliability are the top networking challenges

- Security **52%**
- Performance **22%**
- Cost **21%**
- Reliability **17%**
